

SBS 静岡健康増進センター共著論文リスト

1) Self-reported rate of eating is associated with higher circulating ALT activity in middle-aged apparently healthy Japanese men.

Kazuki Mochizuki, Rie Miyauchi, Natsuyo Hariya, Yasumi Misaki, Nobuhiko Kasezawa, Kazushige Tohyama, Toshinao Goda

[*European Journal of Nutrition* 52 \(3\) : 985-990 \(2013\)](#)

2) Serum γ -GTP activity is closely associated with serum CRP levels in non-overweight and overweight middle-aged Japanese men.

Akiko Sunto, Kazuki Mochizuki, Rie Miyauchi, Yasumi Misaki, Masaya Shimada, Nobuhiko Kasezawa, Kazushige Tohyama, Toshinao Goda

[*Journal of Nutritional Science and Vitaminology* 59 \(2\) : 108-114 \(2013\)](#)

3) Plasma sE-selectin level positively correlated with neutrophil count and diastolic blood pressure in Japanese men.

Kazuki Mochizuki, Seiya Inoue, Rie Miyauchi, Yasumi Misaki, Masaya Shimada, Nobuhiko Kasezawa, Kazushige Tohyama, Toshinao Goda

[*Journal of Nutritional Science and Vitaminology* 59: \(2013\)](#)
